Sean is a busy guy with a lot going on all day.

Sean is taking 5 online courses at once, and each one handles assignments differently.

Eventually, Sean was worried about missing assignments in class just from not being able to keep up with it all.

Thats when Sean learned from a friend of his about an all new app that could keep track of all your classes at once on a single organized service

Later that day, Sean tried out the new tool and found that is was very easy to set up.
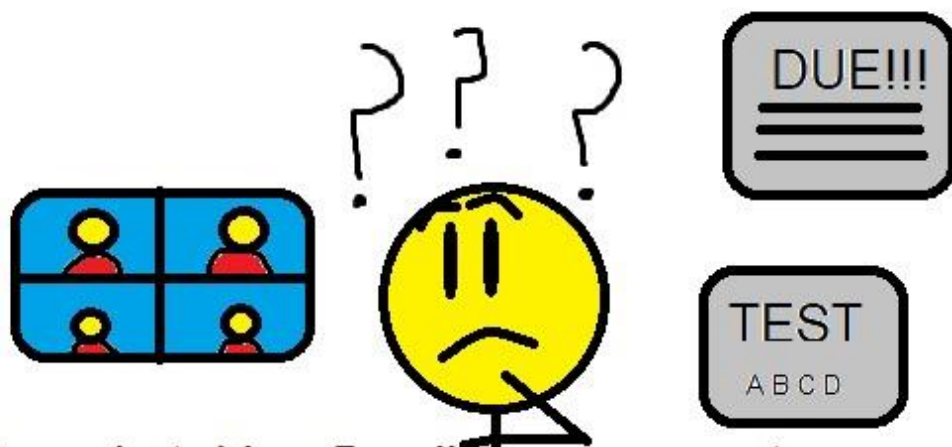

Now Sean can keep up with all his classwork perfectly fine, thanks to this excellent new app!
